

Holiday Web Page Project

This Project is worth up to 200 points.

You are to develop a seven to ten page web site. The subject of your site is “Winter Holidays”. Your primary folder will be named “**holiday web**”. You are to have backgrounds and clip art on each page that supports the theme. You are to follow all the conventions that you have been taught in class about file naming, tables, hyperlinks and **all others**. You are to have no less than two, different, special effects on your web site. Arrangement, attractiveness, and functionality of the site are paramount.

Use the rubric/check list that is in your 3-ring binder to make sure that you have met all the requirements. When you tell the instructor that you are finished you will **NOT** be able to make changes to your web site.

You will have four class periods to complete the project, Friday, December 12, Monday, December 15, Tuesday, December 15 & Wednesday, December 17.

When you complete your web site and checked it against the rubric you are to resume work on FCAT Explorer.
