TIME – Record the time the data is collected.

TEMP. – Record temperature in both Celsius and Fahrenheit.

PRECIP. – Record total amount of precipitation and indicate the type of precipitation you have observed (rain, sleet, snow, etc.).

AIR PRESSURE – Record the air pressure and indicate if it has raised or dropped since the last reading.

HUMIDITY – Record the percent humidity.

WIND SPEED – Record the wind speed (knots). Use the Beaufort Wind speed scale.

WIND DIRECTION – Record the wind direction.

CLOUD COVERAGE – Record the amount of clouds in the sky using the symbols on the back of this page.
