### **What happens if my child creates an account and they are under 13 years old?**

Facebook requires its users to be at least 13 years old before they can create an account. Providing false information to create an account is a violation of our Statement of Rights and Responsibilities.

Applicable laws may give parents the right to access personal information their child has provided before Facebook follows its policy of promptly deleting such accounts. If you are aware of your underage child having an account on Facebook, you can show them how to delete their account by having them log into their profile and following this [link](#).

If you would like to report an underage user (under 13 years of age), please do so [here](#). We will promptly delete the account of any underage user that is reported to us through this form.
